

RELEASE NOTES 43.0.2.2

The *Postal One* System Release 43.0.2.2 was deployed on April 13, 2016 to introduce software fixes to the system. This includes corrections to issues identified in a prior release.

These Release Notes provide the contents of the release and the affected subsystems.

This document was updated to include a related data update (DR 9434) being deployed April 19, 2016, which completes the resolution for ETR 9414.

1. Mail.dat Client Downloads

There is no new Mail.dat client download required for this release.

The current Mail.dat Client may be downloaded from the Business Customer Gateway (BCG) using the path:
Mail Services > Electronic Data Exchange > Mail.dat download for Windows

2. Corrections to Known Issues

This information is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs).

2.1 Dashboard

The Postal One System Dashboard has been updated to eliminate the display of duplicate Full-Service lines on master postage statements. Previously, a defect displayed duplicate individual Full-Service lines because they were grouped by the Full-Service amounts for Standard Mail and First-Class Mail. These were display issues only and did not affect postage. [9399 {B}](#)

2.2 eInduction

eInduction processing has been updated to correct a defect introduced in the Postal One System release on April 10, 2016. The eInduction Entry Point Discount (EPD) verification process did not retrieve all valid entry facility types for evaluation in some cases. This occurred when the scanned entry facility was co-located with an entry facility type matching the facility type claimed by the mailer. Because of the issue, invalid post-induction EPD errors were reflected on the Mailer Scorecard eInduction tab. With this release, the Mailer Scorecard is updated to remove the invalid errors. In addition, on April 19, 2016 the Mailer Scorecard data is was updated to remove the invalid EPD errors that occurred between April 10 and April 13. [9414 {B}](#), [9434 {B}](#)

2.3 International Postage Processing

Prior to the April 10, 2016 Postal One System release and price change, Extra Services (PS Form 3700 Part S) for First-Class International Mail Package Services were the same prices for market dominant products and competitive products. The April 10, 2016 price change was the first time market dominant products were split from competitive products; with that release, new competitive pricing for Extra Services lines S1, S6, and S9 was introduced. However, a defect prevented the prices for these three Extra Service lines from being implemented correctly, as shown in the paragraphs below.

2.3.1 Market Dominant Prices in the Postal One System On or Before April 13, 2016:

S1, Certificate of Mailing (three or more – PS Form 3877): \$0.36

S6, Registered Mail: \$13.40

S9, Return Receipt (PS Form 2865): \$3.70

2.3.2 Competitive Prices for First-Class Mail International Package Services:

S1, Certificate of Mailing (three or more - Form 3877): \$0.49

S6, Registered Mail: \$13.95

S9, Return Receipt (Form 2865): \$3.85 [9390 {B}](#)

3. ALM ID Index

9390, 9396, 9399, 9414, 9434
